

# CuraNet Project Progress

Adarsh Priydarshi

Wednesday 12<sup>th</sup> February, 2025

## Initial Setup

- Project **CuraNet** initialized for healthcare management.
- Directory structure created: **backend**, **frontend**, **database**, **docs**.
- GitHub repository initialized, **main** branch set as primary.

## Backend Packaging

- Backend folder structured with **app.py** and **\_\_init\_\_.py**.
- Packaged project with **setup.py**, making **curanet** executable via CLI.
- Confirmed functionality with CLI output: **CuraNet is running!**.

## Next Steps

- Design database schema and ER diagrams.
- Implement and integrate database with backend.
- Continue documenting progress after each milestone.
